Professional Summary

Python Backend Developer skilled in Django, DRF, PostgreSQL, REST APIs, FastAPI, JWT, Git, and Docker.

Technical Skills

- **Languages:** Python, SQL, JavaScript, C
- **Backend:** Django, Django REST Framework (DRF), FastAPI
- **Databases:** PostgreSQL, MySQL
- **APIs & Authentication:** REST APIs, JWT, SimpleJWT, Authentication & Authorization
- **Tools:** Git, GitHub, Docker, Docker Compose

Education

Bachelor of Computer Application (BCA)

2020 – 2025

Tribhuvan University

Professional Experience

Backend Developer Intern

Nov 2024 – Feb 2025

Nepal Oil Corporation, Lokanthali, Bhaktapur, Nepal

- Developed and maintained REST APIs for job postings, candidate applications, resume uploads, and candidate-shortlisting workflows.
- Implemented backend validation, authentication logic, and secure handling of application and candidate data.
- Collaborated with frontend developers to integrate user interfaces with backend API endpoints.

Lecturer

2025 – Present

Arunima College, Baudha, Kathmandu, Nepal

- Teach C Programming and Operation Research to undergraduate students.
- Mentor students in programming fundamentals, analytical thinking, debugging, and problem solving.

Projects

StockVault

Python, Django, DRF, JWT

- Built a REST API backend for managing user-specific stock portfolio data using Django and Django REST Framework.
- Implemented JWT authentication and authorization to protect API endpoints and isolate user-specific resources.

 ghantheyyy/StockVault

Online Entrance Preparation System

Django, PostgreSQL

- Developed the backend for an online examination and entrance preparation platform.
- Implemented authentication, quiz functionality, automated scoring, and result tracking.

 ghantheyyy/Online-Entrance-Preparation-Backend

Django Production Starter

Django, DRF, JWT, Docker

- Created a reusable Django backend starter with REST API support and JWT authentication using secure HttpOnly cookies with Docker-based application setup

 ghantheyyy/django_prod_strater

URL Shortener

Python, FastAPI, REST APIs

- Developed a FastAPI application that generates shortened URLs and redirects users to their original destinations.
- Designed REST API endpoints for creating and resolving shortened links.

 ghantheyyy/URL-Shortner

numpy

Python

- Developed a reusable Python utility library focused on modular code organization and simplifying common development tasks.
